

Perlenkinder News February 2025 School Start

February 2025 marks the start of an exciting phase of life for the children from Buhoma: they return to the new school year full of anticipation after a long period of holiday of 8 weeks! The first semester of a total of three in the current school year is just around the corner, and the preparations for it are truly enormous. The sewing machines are whirring while the colourful school uniforms are being made with much love and care. At the same time, the shelves are being filled with school materials and books to improve the children's thirst for knowledge

The excitement can be felt, because the children can hardly wait to laugh and learn with their friends again. But there is an even greater fire burning in their hearts: the desire for education. They have understood that knowledge is the key to a better future. With each new school year, they hope that their loyal school sponsors will continue to support them financially by taking on a school sponsorship.
